

DEAR INTERESTED PARTIES,

Since the foundation of a small locksmith and repair shop by Arnold Heinrich Meyer in 1913, A.H. Meyer Maschinenfabrik has developed into an economically strong medium-sized company. For over 100 years, we have maintained a balance between tradition and innovation, so that you can benefit equally from our ability to innovate and our expertise in the field of machine construction. Our employees share a common vision and want to pass on their knowledge and skills to the next generation.

We are your reliable service provider and partner. Also in the future we would like to be there for you, because our claim is your satisfaction. That is why we manufacture conveyor systems, assemblies and special machines according to your individual requirements. From the design to finished component: Everything from one source. Please contact us, we will advise you!

Sincerely

Hans-Günter, Thomas and Steffen Roess

COMPANY
WEBSITE

WE MAKE MACHINES WORK

Maintenance, service, sales or assembly: Our team is at your disposal to help you competently with your concerns. Even after commissioning, we remain there for you. Feel free to contact us:

- Planning & Projecting
- Development & Design
- Documentation & Commissioning

Managing Director
Hans-Günter Roess

Managing Director
Thomas Roess

Managing Director
Steffen Roess

1913 Foundation of the company by engineer Arnold Heinrich Meyer

1948 After the founder's death his wife, daughter and son-in-law (Hans Roess) take over the company

1965 In March 1965 the new factory „Am Bahnhof 54“ is completed

1920 TO 1940 Development of machines for processing straw sleeves [Malotten]

1950 TO 1964 Processing of pressed straw and development of the first fast running blanket machine

STRONG TEAM, GREAT SOLUTIONS, SATISFIED CUSTOMERS

With our strong workforce we are the largest company in the „Roess Nature Group“. Our approximately 70 employees make the company distinctive through experience, passion and commitment.

In an ongoing process of growth, our dedicated professionals regularly participate in training and education to keep them up to date. In addition, we offer qualified apprenticeships in cooperation with the taff! network in Bassum - for the best possible start to your career.

The taff!-network is an initiative of regional companies from the industrial-technical sector. The basis for successful training with taff! is primarily based on the fact that we have added a further pillar to the dual training system: our own inter-company training center. The trainees spend a total of around 120 to 150 days there, learning everything they need for their job in a state-of-the-art working environment.

We are constantly looking for motivated trainees and students in the following fields:

- *Technical Product Designer (m/f/d)*
- *Cutting Machine Operator (m/f/d)*
- *Industrial Mechanic (m/f/d)*
- *Office Management Assistant (m/f/d)*

1975 Hedwig Roess takes over
the management

1995 TO 2012 Further development of various
machines such as pellet and
stitching machine

1970 TO 1974 Development of blanket and
wrapping machines

1994 The brothers Hans-Günter and
Thomas Roess take over the company
A. H. Meyer Maschinenfabrik

TODAY Through continuous develop-
ment and modernization we are a
worldwide operating company

WE BRING YOUR IDEAS INTO SHAPE

We realize your projects from planning to commissioning - all from one source. Our design department has a team of qualified employees who develop tailor-made machines entirely according to your demands.

We consider the assembly manufacturing as a whole. We coordinate production methods, assembly and joining processes with you. Your ideas are in the best hands with us. Because we deliver your products reliably at the agreed time and in the desired quality.

OUR SERVICES:

- *Planning, Development and Design*
- *Production of Individual Parts and Series*
- *Welding Work*
- *Manufacturing of Welded Constructions*

ArcelorMittal

ACCURATE TO SIZE WE CAN

Our specialization is the machining of single parts and small series and the processing of various materials depending on the order. Regionally and throughout Germany we can refer to satisfied customers from numerous industries.

Thanks to our highly qualified team, the most modern machine tools and good upstream suppliers, we are able to offer even the most difficult tasks in a marketable manner. The quality of the manufactured components, the constant exchange with our customers and the adherence to delivery dates have the highest priority for us. Our goal is to meet all the requirements and demands of our customers by providing reliable, intensive advice and processing of the orders and products handed over to us.

With our CNC-controlled processing machines we can meet almost all requirements. The turning and milling centers we use are masterpieces in terms of speed and precision – features from which you will benefit!

If it has to go fast again: Our extensive material stock gives us the possibility to start processing your orders at short notice. This means you benefit from shorter delivery times and remain flexible.

Convince yourself of our efficiency.

CONVEYOR
TECHNOLOGY

TRANSPORT SOLUTIONS MADE IN TWISTRINGEN

Whether piece goods or bulk materials - we manufacture a wide range of different conveyors for various applications. In addition to the characteristics of the material to be conveyed, the production process and the degree of automation also determine the choice of suitable technology. We can provide you with the right conveyor technology for your application, from a single belt conveyor to an automated pallet conveyor system with all the necessary components such as corner transfer units or lifting devices. Our long-standing partnership with the world market leader Interroll under the „Rolling On Interroll“ quality seal and the „Approved Accelerator“ status we have been awarded are also a mark of the highest safety and quality for our customers.

OUR CONVEYOR TECHNOLOGY SPECTRUM AT A GLANCE:

- Belt Conveyors (Flat or Troughed) for Piece Goods or Bulk Materials
- Sidewall Belt Conveyors
- Roller Conveyors for Pallets or Boxes and Containers
- Corner Transfer Units
- Turntable Conveyors
- Lifting Devices
- ...

Our conveyor systems in light and heavy construction can be customized by additional components in individual design.

A WIDE RANGE

Customized machines for a wide variety of applications have been our strength for over 100 years. Our specialists accompany you from the initial idea to the finished machine.

From laser sheet metal cutting and welded constructions to painting and assembly: We manufacture with a quality you can always rely on.

OUR PRODUCTION RANGE AT A GLANCE:

- Racks and Frame Constructions
- Handling and Transfer Equipment
- Lifting and Tilting Devices
- Roll-up Unit
- Dosing Systems for Bulk Material
- ...

SPECIAL MACHINES FOR FIBER PROCESSING:

- Fiber Blanket Production Lines
- Drainage Filter Wrapping Machines
- Straw Wattle Production Lines
- Bale Opener
- Various Components for Fiber Processing

Our **production machines for fabric blankets** made of natural and synthetic fibers are available up to a width of six meters and equipped with various additional components depending on the requirements. The main areas of application are:

- Erosion Control and greening Blankets
- Filter and Drainage Blankets

Our **Straw Wattle / Water Log Machines** produce water logs and wattles from coir, straw or other natural fibers. Waterlogs are used to reinforce river banks naturally.

With our **Drainage Filter Wrapping Plants** we encase irrigation and drainage pipes from 15 mm to 500 mm in diameter with loose natural or synthetic fibers or filter blankets. Our complete systems can also be supplemented with customized components such as length compensation towers.

Wirkmaschinennadeln

Bei Groz-Beckert sind alle Komponenten eines Wirksystems exakt aufeinander abgestimmt. Das perfekte Zusammenspiel von Wirkmaschinennadeln und Systemteilen garantiert einen gleichmäßigen und fehlerfreien Wirkprozess. Maschinenbauer weltweit vertrauen auf Groz-Beckert als Entwicklungspartner und Qualitätslieferant. Auf Basis dieses Know-hows entwickeln wir unser Produktangebot kontinuierlich weiter.
