

EXPERIENCE MAKES
THE DIFFERENCE

About us

More than 100 years of experience in special machine construction provide the basis of our medium-sized enterprise.

We manufacture individual special machines and conveyor systems as well as single parts and small batches according to our customers' wishes. Our team of experts creates sophisticated solutions with modern CAD and CNC machines. We offer you complex services from drafts to finished components – everything from one source!

We put special emphasis on reliability and adherence to delivery dates because the adequate implementation of your ideas is what characterizes us as your partner. Our comprehensive quality management system provides you with the guarantee of reliable products for your success.

We safeguard our company's innovative strength through continuous education and further training of our motivated employees. At the same time, we take our long-standing experience into account because the consistent development in terms of implementation and technology constitutes an integral part of A.H. Meyer Maschinenfabrik.

EROSION CONTROL
BLANKET MACHINE

Erosion Control Blanket Machine

Our production line can, besides Erosion Control Blankets produce also mulch blankets, roof greening blankets, folimatt blankets and other blankets for special applications made from natural fibers like coir fiber, straw, rice straw, excelsior, jute, hemp, etc. as well as synthetic fibers. The production line is individually fitted to the needs of our customers and can vary in size, layout and accessories.

In the field of production systems, we manufacture complete machines for a wide range of applications.

Our machines can also be customised according to your requirements. Please contact us for a quotation.

CONVEYOR
TECHNOLOGY

THINKING IN SOLUTIONS

The fundamental requirements for modern conveyor technology are diverse but in many cases small details distinguish sophisticated solutions from standard products.

For this reason, A.H. Meyer Maschinenfabrik manufactures innovative and well-engineered conveyor technology which does not only meet your requirements today but is flexibly adaptable to future developments as well.

Our high-quality conveyors and transport systems are tailored to your exact needs, cost-effective and proven through tried and tested basic modules.
